

LAUD ASANTE

Data Scientist | Machine Learning · Forecasting · Optimisation · MLOps
Kingston Upon Hull, UK | 07377 261 459 | asantelaud@gmail.com | [LinkedIn](#) | [GitHub](#)
Portfolio: in progress on Railway [add live URL once hosted]

PROFESSIONAL SUMMARY

MSc Data Science and Artificial Intelligence candidate (University of Hull, expected Nov 2026) with six years of commercial and operational management experience and a quantitative foundation in Mathematics and Economics. Builds end-to-end ML pipelines, forecasting models, and optimisation-driven classifiers in Python and SQL, delivering Power BI dashboards for non-technical stakeholders. Regularly translates technical research findings into plain-language explanations for non-technical audiences, demonstrated through an active public LinkedIn presence. Maintains an open, documented portfolio of ML projects on GitHub.

CORE TECHNICAL SKILLS

Languages	Python (Advanced) · SQL / MySQL · Bash
ML / DL	Scikit-learn · TensorFlow/Keras · XGBoost · LightGBM · PyTorch · GNN/GAT · LSTM/GRU · Transformers
Forecasting	SARIMA / SARIMAX · Time-Series Analysis · Demand Planning
NLP	NLTK · spaCy · TF-IDF · Transformer fine-tuning (MiniLM) · Sentiment Analysis
Statistics	Hypothesis Testing · A/B Testing · Bayesian Inference · McNemar's Test · Regression
Data Eng. & BI	Pandas · NumPy · SQLAlchemy · ETL Pipelines · Power BI · Matplotlib/Seaborn
Optimisation	Hyperparameter Tuning (Grid/Random/Bayesian) · Feature Selection · Cost-sensitive Thresholding
MLOps / Dev	Git/GitHub · Jupyter · Docker (familiar) · MLflow (familiar) · CI/CD awareness · AWS (awareness)

SELECTED PROJECTS

MSc Dissertation (in progress): US County-Level COVID-19 Forecasting · SARIMA · SARIMAX · XGBoost · LSTM · GAT-LSTM · Supervised by Dr. Tongxin Chen · Expected Nov 2026

- Building a four-notebook, seven-model forecasting pipeline (SARIMA, SARIMAX, XGBoost, LSTM, GAT-LSTM variants) benchmarked across 3,219 US counties.
- Current headline result:** SARIMA leads with $R^2 = 0.745$, outperforming the more complex GAT-LSTM architectures so far, an evidence-based case in progress for choosing the simpler model that actually generalises.

NexaHeat FX: Forex Intelligence Platform · Python · Twelve Data API · Claude/Groq/Gemini · Solo build, ongoing

- Designed and built a browser-based FX intelligence tool from scratch: live market data integrated with three LLM providers for real-time commentary and signals, plus a currency-strength heatmap and order-flow engine.
- Outcome:** Shipped a working, end-to-end multi-API product independently; now scoping a market-prediction layer (XGBoost, progressing toward a Temporal Fusion Transformer).

Sarcasm Detection: Deployment-Ready Model Comparison · Python · TensorFlow/Keras · Scikit-learn · Transformers (MiniLM)

- Compared six approaches (Naive Bayes, Logistic Regression, LSTM, GRU, and MiniLM frozen/fine-tuned) for sarcasm detection on 28,503 headlines, then stress-tested every model on 24 out-of-domain sentences.
- Outcome:** Fine-tuned MiniLM reached 92% in-domain accuracy (0.974 AUC-ROC) but collapsed to 50% (chance level) out-of-domain, identical to the weaker LSTM; significance confirmed via McNemar's test ($p < 0.001$). Repo: github.com/Laud1ens/Sarcasm-detection-using-AI---NLP-Project

UK Road Safety & Social Network Analysis · Python · GeoPandas · NetworkX · Big Data module, High Distinction

- Mined UK STATS19 road accident records alongside SNAP Facebook ego-network graph data to surface geographic and social patterns at scale.
- Outcome:** Delivered a combined structured-data and network-graph analysis to High Distinction standard, turning messy public safety data into geography-specific, decision-ready patterns.

EDUCATION

MSc Data Science and Artificial Intelligence | University of Hull

Sept 2024 - Present

- Modules: Machine Learning for Healthcare · Big Data Analytics · Neural Network Design · Advanced Statistical Modelling · Bioinformatics · Scalable AI Systems.

Data Analysis Bootcamp | Generation Ghana

Aug - Oct 2024

- One-month intensive with inbuilt data analyst mentoring; Excel, SQL, Python, Power BI; hands-on EDA and dashboard delivery.

BA Mathematics and Economics | University of Ghana

Completed May 2015

- Quantitative analysis, econometrics, probability theory, linear algebra.

CERTIFICATIONS & CPD

-
- **IBM Data Science Professional Certificate** (10-course) - IBM/Coursera, 2024 - *[credential link: add]*
 - **Machine Learning Specialization** (3-course) - Andrew Ng/DeepLearning.AI, 2024 - *[credential link: add]*
 - **Google Data Analytics Professional Certificate** - Google/Coursera, 2024 - *[credential link: add]*
 - **Deep Learning Specialization** (5-course) - DeepLearning.AI/Coursera, 2024-25 - *[credential link: add]*
 - **Google Developer Program** - 9 ML/AI knowledge badges, Google for Developers, 2025

PROFESSIONAL EXPERIENCE

Strategic Area Sales Manager | Sweet Nutrition Limited

Jun 2022 - Oct 2025

- AI-assisted trend analysis and Excel forecasting across 5 territories and 200+ accounts; produced analytical reports and KPI dashboards for senior leadership across 3 product categories.

Branch Sales Manager | Classfam Pharmaceuticals

2021 - 2022

- Managed branch operations in a regulated pharmaceutical environment; applied data-integrity and audit-trail standards directly analogous to production ML data governance.

Territory Sales Supervisor / Manager | Sunda Invest Limited

2018 - 2021

- Supervised cross-functional field teams against KPI targets; analysed sales throughput to identify territory-level efficiency gaps.

ADDITIONAL

-
- GitHub: github.com/Laud1ens | *Portfolio in progress (Railway)*
 - LinkedIn: [linkedin.com/in/laud-asante-938382103](https://www.linkedin.com/in/laud-asante-938382103) - publishes plain-language breakdowns of ML research, model debugging, and data science practice for non-technical audiences.
 - Availability: part-time internships (15 hrs/week) immediately; graduate scheme and junior Data Scientist / Machine Learning roles. Hull-based; on-site, hybrid, or remote.
